Specialty Nursery for Fruit and Ornamental Plants

At **Cloud Mountain Farm**, we propagate and grow top quality fruit trees, nut trees, berry plants, and ornamental landscape trees and plants. You will find a large variety of dwarf conifers and Japanese maples among our offerings. We also carry hard-to-find orchard and garden supplies, quality tools, and garden books. We can also custom propagate and grow plants for those who need large quantities of a particular plant, grape vines for a small vineyard, or for hard-to-find or heirloom fruit trees. **We ship plants from early February through May, and again September and October**, but you can order anytime. **Or come visit us, February through Thanksgiving.**
