

DFIC 113

[Ficus carica](#) L. MORACEAE

Unverified name: Capitola Long.

Donated from: California, United States (Comment: Donated to NCGR, Davis.)

Maintained by the [Natl. Germplasm Repository - Davis](#). NPGS received: 25-Feb-1986. Life form: Tree. Form received: Cutting.

Accession names and identifiers

Capitola Long

Type: UNVERIFIED.

DFIC 113

Type: SITE.

Availability

Material is available for distribution.

Narrative

Per R. Morgan, 2/16/1986: "Fruit is fairly large (to 97 grams), long and narrow, not splitting, with light brown skin, pink or reddish-amber flesh, good flavor. Fall ripening (but seems to want more heat than it gets here near the coast, so doesn't produce much of a crop before cold weather sets in). I only know of one tree."

Source History

- Type: Donated. Date: 25-Feb-1986. From: California, United States.
Cooperators:
 - [Morgan, R.](#)Comment: Donated to NCGR, Davis.
