

DFIC 15

[Ficus carica](#) L. MORACEAE

Unverified name: DiRedo.

Donated from: California, United States (Comment: Donated to NCGR, Davis.)

Maintained by the [Natl. Germplasm Repository - Davis](#). NPGS received: 01-Jan-1982. Life form: Tree. Form received: Cutting.

Accession names and identifiers

DiRedo

Type: UNVERIFIED.

DFIC 15

Type: SITE.

Availability

Material is available for distribution.

Narrative

Info. from Commercial Dried Fig Production in California, University of California, Leaflet 21051, p. 5, November 1978: DiRedo is another selection originating from the University of California breeding program. It is as productive as Adriatic, but it has a smaller eye and thus fewer quality problems. The dried figs are similar to those of Adriatic, but the tree leafs out 10 to 12 days later. There is an off-type (low-yielding) DiRedo present in some DiRedo orchards. Care should be taken not to select wood for propagation from such trees.

Source History

- Type: Donated. Date: Jan-1982. From: California, United States.
Cooperators:
 - [University of California](#).Comment: Donated to NCGR, Davis.

Pedigree

Adriatic X 7280
