

DFIC 209

[Ficus carica](#) L. MORACEAE

Cultivar name: Gazir.

Donated from: California, United States (Comment: Donated to NCGR, Davis; 1 cutting received. Kennedy received from Patrick Schafer)

Maintained by the [Natl. Germplasm Repository - Davis](#). NPGS received: 27-Feb-2003. Life form: Tree. Form received: Cutting.

Accession names and identifiers

Gazir

Type: CULTIVAR.

DFIC 209

Type: SITE.

Availability

Material not available at this time, contact the maintenance site for more information.

Narrative

Per Condit (see citation): " Described by Guillochon (1913, 1927, 1929) as medium-sized fig, violet in color. On the other hand, Minangoin (1931) described Gazir as a yellow fig with rose-colored pulp when caprified." Gazir is also described on page 12 of Russian book Katjiof.

Source History

- Type: Donated. Date: 27-Feb-2003. From: California, United States.

Cooperators:

- [Kennedy, C., California Rare Fruit Growers.](#)
- [Schafer, P.](#)

Comment: Donated to NCGR, Davis; 1 cutting received. Kennedy received from Patrick Schafer.
