### Conadria

**Yellow fig with high sugar content. Can be used for dried figs and fresh fruit. Introduced in 1955 B Ira Condit USDA Riverside, CA. Fruit resists spoilage in rainy weather and has a small eye so it rates good for insect resistance. Produces 2 crops. The 1st crop, breba crop is good, the second crop, very good. In zone 7 produces only one crop. Can be grown in a 10g pot and planted in the ground, in the pot, after winter storage (temps no lower than 30°F) where it will root through the pot and produce large excellent**

**Hardy Chicago**

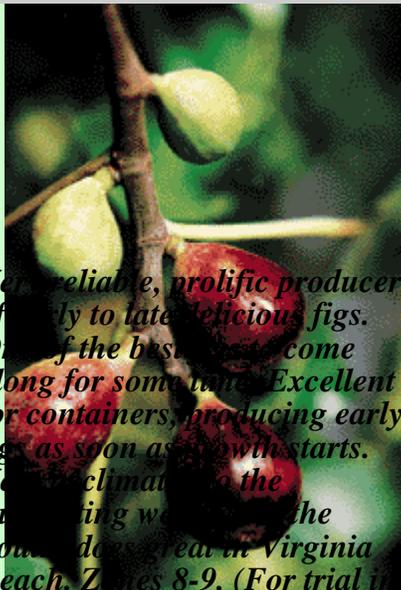

*Brown, rich and sweet. Good for potted culture. In 1999, we picked the first ripe outdoor figs on July 31st. Does extremely well in N.C. and we send this one to enthusiasts up north, because of its early fruiting tendency. Zones 6-8.*

**1 Quart - ~~\$18.00~~ - \$14.40**

**LSU Purple**

*Very reliable, prolific producer of early to late delicious figs. One of the best to come along for some time. Excellent for containers, producing early figs as soon as growth starts. Very adaptable to the fluctuating weather of the South. Does great in Virginia Beach, Zones 8-9. (For trial in Zone 7). Has fruited well at our nursery (zone 7). Best to pick a few days after fruit turns black, wrinkles and elongates.*

3 Gallon - ~~\$48.00~~ - \$38.40

### *Osborne Prolific*

*This fig has fruited for us at the nursery about one week after the St. Anthony Marseilles. It differs from most of our varieties with its reddish skin color and amber flesh. There is a darker fig variety also called Osborne that may be Brunswick. I enjoy this fig fresh in summer and fresh frozen in the winter. Space @ 8' circle. Zone 7-9.*

### *Petite Negri*

*Large black fig with excellent flavor. One of the best producers for pot culture. The dwarf plant is very productive. Similar to Black Mission and Violet de Bordeaux fig and produces an early and late crop when potted. Outside culture in zone 7-9. Produces one crop outside at our nursery. Space @ 8' circle.*

### *TXBA-1*

*Sweetest of our collection. Hardy in 7 if protected from the wind. The three light brown figs pictured to the left are Texas BA-1. Space 10' circle. Ripens @ 2 weeks later than Hardy Chicago. Zone 7-8*

View [detailed information/ careguide](#)

*Please Choose A Size:*

1 Quart - ~~\$18.00~~ - \$14.40

### *Violet de Bordeaux*

*(Negronne) Purplish-black fruit with rich strawberry pulp. Considered by many the finest tasting fig. Popular in the Northwest and West. Needs protection in cold winter areas. Good for home planting as tree is dwarf. Fruit ripens later than Hardy Chicago, Marseilles and Celeste. Closed eye. Space @ 8' circle. Zones 7b-9.*
