

# Fruit Trees for Arizona

Kind	Variety	Zones (Sunset)	Season	Maturity Zone 13	Remarks	Self- fruitful
Almond	All-in-One (semi-dwarfing)	8-10,12-16,19-21		August	Medium to large. Soft shelled with good quality sweet kernels. Classified semi-dwarf to 15 feet. Chilling requirement of 500 hours (may not be suited for Salt River Valley). Number 1 almond for home orchards.	x
Almond	Garden Prince Genetic Dwarf	8-10,12-16,19-21		August	Compact, lushly foliated 10-12 foot tree. Soft shell, kernels especially sweet and tasty. Bears young and heavy. Chilling requirement of 250 hours.	x
Almond	Neplus Ultra	8-10,12-16,19-21		August	Large soft-shelled nut, long broad flat kernel. Chilling requirement of 250 hours. Needs pollinizer. Best pollinizer: Nonpareil.	

Almond	Nonpareil Almond:	8-10,12-16,19-21		August	No. 1 commercial almond, the standard of quality. Inter-fruitful with All-In-One and Neplus. Chilling requirement 400 hours. Pollenizer required	
Apple	Anna	24-Jul		June	Excellent flavor when ripe. Breaks down rapidly. Needs fruit thinning. Remarkable fruit for mild-winter climates in Southern Arizona. Heavy crops of sweet, crisp, flavorful apples even in low desert. Fresh or cooked. Keeps 2 months in refrigerator. Chilling requirement 200 hours. Self-fruitful or pollinated by Dorsett Golden or Ein shemer	x
Apple	Arkansas Black	1-3,10-11	L		Deep red colored fruit. Flesh is hard and crisp - needs pollenizer.	

Apple	Beverly Hills	12,13,18-24		June	Produces a pale yellow medium sized fruit. Chilling requirement 300 hours.	x
Apple	Braeburn	1-10,14-16	L		Medium to large size fruit with crisp firm flesh. Fruit set better with pollenizer	
Apple	Dorsett Golden	12,13,17-24	E	June	Yellow, flavorful, firm. Outstanding sweet apple for warm winter areas. Firm, very flavorful, sweet like Golden Delicious. Productive throughout the low desert. Good early season sweet apple. Chilling requirement of 100 hours.	x
Apple	Ein shemer	12,13,17-24		June	Heavy-bearing, very low chilling requirement of 100 hours. Sweet yellow apples. Excellent pollenizer for Anna.	x
Apple	Empire	2,3,6,7,10,14-16	M		Medium dark red fruit with white creamy flesh.	

Apple	Firm Gold	2,10	L		Yellow large fruited type of golden delicious.	
Apple	Fuji	7-10,14-16	L	August	Dull red, medium sized fruit. Very sweet with excellent aroma and cream colored flesh. Recently introduced from Japan, has quickly become California's favorite apple. Sweet, very crisp and flavorful, excellent keeper. Dull reddish-orange skin, sometimes russeted. Chilling requirement listed as 600 hours, but preliminary testing in the low desert indicate that it may be less.	x
Apple	Gala	4-10,14-16	M	August	Medium size fruit. Red blush over yellow color with aromatic flavor. Wonderful dessert apple from New Zealand. Crisp, nice blend of sweetness and tartness, rich flavor. Skin reddish-orange	

					over yellow. Chilling requirement listed as 500-600 hours, preliminary testings suggest it maybe less.	x
Apple	Golden Delicious	1-3,7-11,14-24	L		Yellow large fruit. Excellent pollenizer.	
Apple	Gordon	2,10,12,18-24		June	Produces a reddish-green fruit for fresh use and cooking. Chilling requirement, 400 hours.	x
Apple	Granny Smith	6-11,14-16	L		Large green fruit with tart flavor. Fruit set better with pollenizer.	
Apple	Gravenstein	4-11,14-24	E		Medium to large fruit. Needs cross pollination.	
Apple	Jerseymac	2,10	E		Fruit has semi-solid red blush; creamy. White flesh - needs thinning.	
Apple	Jonagold	2-10,14-16	M		Large golden apple with red stripes. Stores well. Need cross pollination.	
Apple	Jonathon	2-10,14-16	M		Red and pale yellow medium size fruit. Firm, tart, crisp flavor.	

Apple	Lodi	2,10	E		Large fruit with tart flavor. Needs cross pollination.	
Apple	Red Delicious	2,10	M		Large red fruit with sweet taste. Need cross pollination.	
Apple	Summered	2-10,15-16	E		Medium to large fruit with red blush	
Apricots	Castlebrite	12,13	E	May	Freestone, excellent flavor. Firm and juicy. Good flavor when fully ripe, otherwise somewhat tart. Good size. Bright orange with red blush. 450 chill hours.	x
Apricots	Gold Kist	12,13	E	5/15-6/15	Freestone, excellent quality. Excellent backyard apricot for warm winter climates. Freestone, very good quality. Heavy bearing. Early harvest, late May to early June. Requires 300 chill hours.	x

Apricots	Katy	12,13	E	5/15-6/15	Excellent size and fruit quality. Freestone. Large, all purpose flavorful freestone. Tree ripe fruit is subacid (not tart). A favorite apricot for warm-winter climates. Early harvest, late May to early June. Requires 400 chill hours.	x
Apricots	Modesto	2,10		5/15-6/15	Commercially grown for shipping. 300-400 hours chilling.	x
Apricots	Moorpark	2,3,6-11,14-16	L		Large fruit and great flavor. Fruit may ripen unevenly.	
Apricots	Patterson	2,10,12,13		June	A vigorous tree. Fruit are medium to large in size with good firm, modestly flavorful flesh. Good for freezing, drying, and canning. Requires 500 chill hours.	x
Apricots	Royal (Blenheim)	2,3,6-23	M		Medium size fruit with excellent flavor and sweetness	

Apricots	Royal Rosa	2,10	E	May	Extremely vigorous, more disease tolerant than other apricots. Bears young and heavy. Especially nice fruit: sweet, low acid, fine flavor. Very early harvest (early-to-mid May). Excellent backyard apricot. Requires 500 chill hours.	X
Apricots	Tilton	1-8,10,11,18,20	M		Medium size fruit with excellent flavor.	
Apricots	Wenatchee	2,3,6,10	M		Large size with yellow skin and flesh.	
Blackberry	Brazos			4/15-5/15	Very vigorous, thorny, erect plant which produces an abundance of large high quality berries. Berries are large, attractive appearance and heavy yields, tart acid flavor.	

Blackberry	Rosborough			4/15-5/15	Vigorous moderately upright canes which produces well in a wide variety of soil and climatic conditions. Fruit are large, attractive in appearance and have a sweeter flavor than Brazos.	
Cherry, sour	Montmorency	1-10,14-17	M		Large bright red fruit which is tart (pie use).	
Cherry, sour	North Star	1-10,14-17	M		Red fruit, tart, genetic dwarf.	
Cherry, sweet	Bing	2,6,7,10,14,15	M		Large black fruit. Excellent quality. Needs pollinizer. Use Van, Stella, or Hedelfingen	
Cherry, sweet	Lambert	2,6,7,10,14,15	L		Fruit dark red, heart shaped; smaller than Bing. Pollinize with Rainier or Van.	
Cherry, sweet	Rainier	2,6,7,10,14,15	M		Fruit has light yellow skin. Needs pollinizer. Use Van, Stella or Bing.	
Cherry, sweet	Stella	2,6,7,10,14,15	L		Black, heart shaped fruit. Self fertile. Good pollinizer.	

Cherry, sweet	Van	2,6,7,10,14,15	M		Dark fruit, good quality. Excellent pollinizer. Use Bing or Rainier
Fig	Black Mission	4-10,12-24	E	August-October	Best all around fig. Two crops. Black skin and strawberry pulp. Popular and flavorful for eating fresh or dried. Medium to large pear-shaped fruit has skin which is black-purple and strawberry-colored flesh. Tree is large and long lived. Well adapted to elevations below 2,000 feet.
Fig	Brown Turkey	4-10,12-24		August-October	Sweet tasting and best eaten fresh. Bell shaped medium to large fruit has brownish-purple skin with pink flesh. Tree is large and best adapted to 2,000 - 3,000 feet. Not as prolific as Mission.

Fig	Conadria	4-10,12-24		August-October	Mild and sweet with whitish-pink flesh. Large fruit with cream to light green colored skin. Good, eaten fresh or dried. Tolerates heat well.	
Fig	Kadota	4-10,12-24	M	August-October	Yellow skin and amber pulp. Good, fresh or dried, suitable for canning. Fruit is medium sized with yellow skin. Flesh is amber with few seeds. Hot weather aids in ripening	
Grapefruit, White	Duncan	8,9,12-24		December-May		
Grapefruit, White	Marsh	8,9,12-24		Mid-Nov to May		
Grapefruit, Pink	Flame	8,9,12-24		Mid-Nov to May		
Grapefruit, Pink	Red Blush	8,9,12-24		Mid-Nov to May		
Grapefruit, Pink	Texas Star Ruby	8,9,12-24		Jan-April		
Grapefruit x Pummelo	Melogold	8,9,12-24		Dec-January		
Grapefruit x Pummelo	Oro Blanco	8,9,12-24		Nov-January		

Grapes	Cardinal	8,9,11-16,18-21		6/15-7/15	Clusters large to medium in size. Very large, seeded, cherry red berries become reddish black with maturity. Use for arbor or summer house. Spur pruned.
Grapes	Exotic			6/15-7/15	Berries are black, large, seeded, crisp and sweet. Berry irregular to oval in shape and has large clusters. Ripen in July. Spur pruned.
Grapes	Fantasty			July	Large, black, seedless berry used for table or raisin. Excellent flavor. Ripens in July. Cane pruned.
Grapes	Flame seedless	6-9,12-21		June	Light red, seedless, crisp, sweet berry. Cool nights are required for full color development. Ripens June - July. Spur pruned.

Grapes	Perlette	3,7-16,18-21		5/15-6/15	Pale green, round, crisp, juicy seedless medium sized berry. Larger than Thompson, unique flavor - mild aromatic in flavor. Spur pruned, ripens in June.	
Grapes	Ruby seedless	8,9,12-16,18-20		6/15-7/15	Dark red, sweet, crisp, excellent fresh or raisin. Ripens after Thompson seedless. Chilling requirement of 100 hours, self-fruitful. Ripens in June. Spur pruned.	
Grapes	Thompson seedless	8,9,11-14,18,19		6/15-7/15	Most popular grape. Green, seedless berry, fresh or raisin. Very sweet. Self-fruitful. Chilling requirement of 100 hours. Ripens mid June - July. Cane pruned.	
Jujube						
Kiwi	Tomuri Male	4-9,12,14-24		November	Pollenizer for Vincent Female. Does not bear fruit. One male can pollinate up to eight Vincent females.	

Kiwi	Vincent Female	4-9,12,14-24		November	Low chilling required, which is adapted to Southern California. Tasty, well-regarded fuzzy skinned fruit. Pollinated by Tomuri male.	
Lemon	Eureka	8,9,12-24		August-Feb		
Lemon	Lisbon	8,9,12-24		August-Feb		
Lemon	Ponderosa	8,9,12-24		Year around	A citron-lemon hybrid, this ponderous choice is a novelty. Fragrant blooms produce gigantic lemons with many seeds. Tree tends to be rangy and open; needs pruning to control shape.	
Lime	Mexican	13,21-23		Year around	(Key Lime) the small bar lime (1.5 inches in diameter), sometime seedy but extremely juicy and a genuine tropical flavor when ripe. Produces year round, but more abundantly in the fall. Very thorny. Very frost sensitive.	

Lime	Tahiti	8,9,12-24		August-Jan	(Bearss, Persian) green lemon size fruit. Thorny branches.	
Lime	Kaffir	13,21-23		August	(Thai lime) The fruit is bumpy. The leaves, fruit juice and zest are used in tropical Asian cuisine. Similar frost resistance as the key lime.	
Lime	Palestine Sweet	13,21-23			Low acidity and sugar. Many people find the taste bland at first, but the taste of the juice grows on you.	
Limequat	Tavares	8,9,12-24		Nov-March		
Kumquat	Fukushu	8,9,12-24		Oct-March		
Kumquat	Meiwa	8,9,12-24		Oct-March		
Kumquat	Nagami	8,9,12-24		Oct-March		
Nectarines	Red Gold	2,10	M		Large, yellow flesh fruit. Self-fruitful, freestone.	
Nectarines	Sun Glo	2,10	M		Large, deep yellow flesh, freestone.	
Olives	Manzanillo	12,13	L		Major processing variety. Medium size fruit.	
Olives	Sevillano	12,13	L		Very large fruit. Good pollenizer for Manzanillo	

Orange, Navel	Cara Cara	12,13		Dec- January	Pigmented navel orange with a crimson flesh similar to red grapefruit. The flavor and peel color of the 'Cara Cara' is similar to other navel orange varieties. Fruit segments are attractive in salads due to its crimson color.	
Orange, Navel	Fukumoto	12,13		10/15-12/31		
Orange, Navel	Lane Late	12,13		January- March		
Orange, Navel	Parent Washington	12,13		Nov- January		
Orange, Sweet	Diller	8,9,12-24		Dec- February		
Orange, Sweet	Hamlin	8,9,12-24		Nov- January		
Orange, Sweet	Marrs	8,9,12-24		10/15-2/15		
Orange, Sweet	Pineapple	8,9,12-24		Dec- February		
Orange, Sweet	Trovita	8,9,12-24		Dec- February		
Orange, Valencia	Campbell	8,9,12-24		Feb-May		
Orange, Valencia	Delta	8,9,12-24		Feb-May		
Orange, Valencia	Midnight	8,9,12-24		Feb-May		
Orange, Valencia	Olinda	8,9,12-24		Feb-May		
Orange, Blood	Moro	8,9,12-24		11/5-3/1		
Orange, Blood	Ruby	8,9,12-24		Jan- February		

Orange, Blood	Salustiana	8,9,12-24		Jan-February		
Orange, Blood	Sanguinelli	8,9,12-24		Jan-March		
Orange, Blood	Tarroco	8,9,12-24		Jan-February		
Peach	August Pride	12,13	E	July	Large, sweet, aromatic, rich flavor. Large, all-purpose yellow freestone for mild-winter climates. Sweet, aromatic, rich flavor, one of the best. Chilling requirement less than 300 hours.	
Peach	Babcock	12,13,15,16,19-24	E	June	White fleshed freestone. Sweet, juicy and aromatic. Low in acid. Long-time favorite white-fleshed freestone. Sweet and juicy, aromatic, low in acid. Very high-scoring in taste test. Chilling requirement of 250-300 hours.	x
Peach	Belle of Georgia	2,10	M		White flesh, soft and juicy. Very productive.	

Peach	Bonanza Miniature	12,13		5/15-6/15	Popular yellow freestone - large fruit is sweet, low in acid, with a mild, refreshing flavor. Mid-to-late May in low desert climates. Five- to six-foot tree. Chilling requirement very low, 250 hours or less.	x
Peach	Cresthaven	2,10	M		Yellow, juicy freestone. Firm and flavorful.	
Peach	Desert Gold	8,9,12,13,23		5/15-6/15	Very early ripening: mid-May in Arizona. Tree-ripened fruit has good flavor and sweetness for such an early variety. Yellow Clingstone. Heavy bearing. Chilling requirement of 250 hours.	x
Peach	Desert Red	12,13		4/15-5/15	An excellent quality, firm cling peach that has good color. Produces large fruit when thinned and girdled. Chilling requirement of 200-300 hours.	x

Peach	Earligrande	12,13	E	May	Large yellow fruit with a distinctive point. Excellent flavor. Medium size, low-chill peach from Gulf Coast Texas. Yellow semi-freestone. Very early (May). Successful in Arizona and similar climates. Chilling requirement of 275 hours.	x
Peach	Eva's Pride	12,13		May	Delicious, fine-flavored peach with very low-chilling requirement. Medium- to large-sized yellow freestone. Ripens early-to-late May. Chilling requirement of 100-200 hours.	x
Peach	Fay Elberta	2,3,6-11,14,15,18,19	M-L	Mid-Late	Large size, good flavor, little red blush, good producer.	
Peach	Flordagrande	12,13,18-24		4/15-5/15	Excellent yellow-fleshed semi-freestone peach. Flesh will have some red coloration at maturity. Requires less than 100 chill hours.	

Peach	Flordaking	12,13,18-24		4/15-5/15	High quality early season peach. Large, firm, flavorful semi-freestone, very sweet when fully ripe. Mid-May in warm winter climates. Chilling requirement 450 hours or less.	x
Peach	Flordaprince	12,13,18-24	E	4/15-5/15	Large to medium size red blush fruit. Semi-clingstone. Needs thinning to make size. From Florida, successfully grown in Arizona. Yellow, semi-cling, larger fruit than Desert Gold, more tolerant of desert heat. Ripens late April to early May in Arizona. Very good quality when tree-ripe. Chilling requirement of 150 hours.	x

Peach	Midpride	12,13	M	June	Yellow freestone. Excellent quality. Best yellow freestone for warm winter climates. Mid-season peach. Chilling requirement of 250 hours.	x
Peach	Ranger	3,5,9,14-16,18	M		Large yellow fruit. Freestone with excellent flavor.	
Peach	Red Globe	3,6-11,14-16	M		Large yellow fruit with red markings. Freestone	
Peach	Redhaven	3,5,12,14-16	M		Medium size fruit. Sets heavy crops and requires heavy thinning.	
Peach	Redskin	1,3,6-12,14-16	M		Yellow flesh with red blush. Heavy producer. Freestone	
Peach	Reliance	9-Apr	L	late Season	Winter hardy. Flesh is soft, juicy and yellow. Freestone.	
Peach	Rio Oso Gem	3,7-9,14,15	M		Large fruit with red skin. Freestone.	

Peach	Tropic Beauty	12,13		5/15-6/15	Excellent quality yellow flesh, firm freestone peach. Produces a large fruit when thinned and girdled properly. Chilling requirement of 100-200 hours. Good for the low desert. Ripens early May.	x
Peach	Tropic Snow	12,13	E	May	Skin is white with red blush. White sweet flesh. Freestone. Medium-sized fruit. Skin is white with red blush. White sweet flesh. Good flavor. Freestone. Ripens early May. Chilling requirement 175-200 hours.	x
Peach	Tropic Sweet	12,13	E	5/15-6/15	Yellow fleshed large freestone. Good quality freestone, yellow-fleshed peach. Fruit are very large when thinned and girdled properly. Ripens just after Tropic Beauty. Chilling requirement of 100-200 hours. Ripens mid-	

					May.	x
Peach	Vallagrande	12,13		5/15-6/15		
Pear, Asian	20th Century	2,3-23	M		Medium to large fruit with greenish yellow skin.	
Pear, Asian	Shinseiki	2,3-23	M	June	Medium to large fruit with yellow skin. Flesh is creamy white and firm. Juicy, sweet, refreshing, crisp like an apple. Easy to grow. Keeps well. Harvest June in the desert. Bright yellow skin. Vigorous, heavy bearing. Chilling requirement of 350-400 hours.	x
Pear, Asian	Yakumo	2,3-23		June	Early harvest, before Shinseiki. Slight tapered neck, instead of round shape of other Japanese pears. Very nice quality - sweet, juicy, refreshing. Crisp like apple when ripe. Chilling requirement of 450 hours. Pollenizer required.	

Pears	Bartlett	1-11,14-18	M		Large fruit with golden yellow color. Green at picking. Needs pollinizer for bet production.	
Pears	Bosc	1-11,14-18	M		Medium to large fruit - long tapering neck, darkly russeted. Stores well.	
Pears	Floridahome	2,3-23	E	6/15-7/15	Medium size fruit with thin green skin. Flesh is white and juicy. Harvest fruit green. Needs pollinizer. Hood is best pollinizer. Very nice quality, sweet, smooth-textured, juicy, flavorful. Early bloom. Chilling requirement less than 400 hours.	
Pears	Hood	2,3-23	E		Good pollinizer for Floridahome.	
Pears	Keiffer	2,3-23	E	6/15-7/15	Fair quality, hard fruit containing grit cells. Needs pollinizer. Medium to large late season fruit. Canning/ cooking. Sprightly flavor, coarse texture. Resists fireblight, tolerates hot	

					climates. Dependable crops. 350 hours.	x
Pears	LeConte	2,3-23	E		High quality, low chill pear. Needs cross pollination.	
Pears	Orient	2,3-23	E		Very large fruit with white flesh.	
Pears	Red Sensation	1-11,14-18	M		Red Bartlett.	
Pears	Seckel	1-11,14-18	M		Small reddish brown fruit. Dessert quality.	
Pears	Surecrop	1-11,14-18	M		Small reddish brown fruit. Dessert quality.	
Pecan	Cheyenne	4-10,12-16,18-23		10/15-11/15	Bears heavy and early. Nuts are medium size, soft shell, with excellent kernel quality. Tree is somewhat susceptible to limb breakage; slow growing tree.	
Pecan	Choctaw	4-10,12-16,18-23		10/15-11/15	Tree is vigorous and is an excellent producer. Moderately precocious. Produces pecans of outstanding quality. Shells are thin and cracks into half kernels very easily.	

Pecan	Comanche	4-10,12-16,18-23		10/15-11/15	Medium to large sized nuts, nearly round, thin shelled. Good producer, nut quality is excellent. Nuts tend to sprout.
Pecan	Sioux	4-10,12-16,18-23		10/15-11/15	Good producer with small to medium sized nuts with outstanding kernel quality. A little slow to begin producing, moderately precocious.
Pecan	Western Schley	4-10,12-16,18-23		10/15-11/15	Easy to grow, nut long, tapered, medium sized, thin-shelled, good kernel quality. Self-fruitful. Early bearing 4 to 5 years. Recommended for single tree planting in home garden. Less affected by zinc deficiency than other cultivars. Precocious and prolific. Tendency for nuts to sprout (pregerm) in the low desert.

Pecan	Wichita	4-10,12-16,18-23		10/15-11/15	Highly flavored, medium to large sized nuts are well-filled, soft shell. Plump, rich, distinctively flavored kernel. Bears heavy at young age. Pollinators are Cheyenne or Western Schley. Prone to zinc deficiency. Strong tendency for nuts to sprout (pregerm) in the low desert.	
Persimmon	Fuyu (Jiro)	7-16,18-23		September	("Apple Persimmon"): Medium size, flat shape, still hard when ripe, non-astringent. Cool or hot climate. Hardy, attractive tree, practically pest free. Chilling requirement 200 hours.	x
Persimmon	Giant Fuyu	7-16,18-23		September	Larger, not so flat as Fuyu. Crunchy when ripe like Fuyu. Sweet, flavorful, non-astringent. Easy to grow, cool or hot climates. Chilling requirement of 200 hours.	x
Persimmon	Hachiya	7-10,14-16,18-23	M		Astringent until soft.	

Persimmon	Hosui	4-10,14-16,18-23	M		Fruit has golden rusted skin. Flesh is firm, juicy and mild.	
Persimmon	Izu	1-11,14-18		September	Very sweet, tasty, non-astringent. Fruit ripen about three weeks before Fuyu. Medium to large size, round shape. Relatively small tree, good choice for backyard persimmon. Sometimes difficult to start from bareroot. Chilling requirement of 100 hours.	x
Plum	Beauty	23-Jul		5/15-6/15	Sweet, flavorful plum. Red over yellow skin, amber flesh streaked red. Chilling requirement of 250 hours.	x
Plum	Fuyer	10	M		Nonstringent and sweet.	
Plum	Green Gage	2-10,14-22	M		Medium size greenish fruit. Practically self-fruitful. Greater yields with cross pollination	

Plum	Gulf Gold	12,13		6/15-7/15	Green-skinned plum which turns yellowish when ripe. Juicy, sweet, yellow flesh. Chilling requirement of 250 hours.	x
Plum	Gulf Ruby	12,13		6/15-7/15	Sweet, juicy plum, with reddish-purple skin and amber flesh. Chilling requirement of 250 hours.	x
Plum	Methley			5/15-6/15	Juicy, sweet, red flesh, mild flavor. Reddish purple skin. Attractive tree, heavy bearing and vigorous. Chilling requirement of 250 hours.	x
Plum	Santa Rosa	2,3,7-23	E	June	Large purple fruit. Yellow flesh. Self-fruitful.	x
Plum	Satsuma	2,3-22	M		Medium dark red, juicy, tart fruit. Most popular plum in California and Arizona. Juicy, tangy, flavorful. Reddish-purple skin, amber flesh tinged red. Chilling requirement of 300 hours.	x

Plum	Stanley	2-10,14-22	L		Large, purple fruit that is juicy and sweet. Self fruitful.	x
Pomegranate	Ozark Premier	2,10	M		Very large red fruit. Self-fruitful.	x
Pomegranate	Wonderful	5,6-24			Bright orange flowers, purplish red fruit.	x
Quince	Champion	2-10,14-24	L		Cold hardy.	
Quince	Orange	3,4-24	M	August	Tart, good quality. Large, round, bright yellow fruits often exceed 1 lb. Flavorful, aromatic, used for cooking. Early harvest. Old variety. Cold hardy, yet low chilling requirement of 300 hours.	x
Quince	Pineapple	3,4-24	M	August	Tart, good quality. Heavy crops of large, tart fruit used in baking, jams, and jellies. Profuse, ornamental bloom. Cold hardy, yet low chilling requirement of 300 hours.	x
Quince	Smyrna	3,4-24	L		Large fruit.	
Quince	Wonderful	3,4-24	L		Red skin color. Self-fruitful.	

Strawberry	Camerosa			March-July	Plants are large and vigorous. Fruit are large, firm wedge shaped berries of good quality.	
Strawberry	Chandler			March-July	Plant is large and vigorous. Produces nice berries which are smaller than Camerosa, but tend to be sweeter.	
Strawberry	Sequoia			March-July	Produces a big vigorous plant. Fruit are large, wedge shaped of high quality, but soft when ripe.	
Strawberry	Tioga			March-July	This plant is very large and vigorous with big, dark green glossy leaves. Fruit are very large, firm wedge shaped berries of medium quality.	
Tangelo	Minneola	8,9,12-24		12/15-3/1		
Tangelo	Orlando	8,9,12-24		11/1-1/15		
Tangerine	Clementine	8,9,12-24		Nov-December	(Algerian tangerine) comes from North Africa	
Tangerine	Daisy	8,9,12-24		Dec-January		
Tangerine	Dancy	8,9,12-24		Dec-January		
Tangerine	Fairchild	8,9,12-24		Nov-December		

Tangerine	Kinnow	8,9,12-24		Dec- February
