 Fruit Trees here,

Kadota Fig

About Kadota Figs

Kadota Fig is a moderately growing fig tree. Fig trees require sun all day to ripen its fruit. Kadota's figs have a yellowish green skin and red, juicy flesh. The figs are rich in flavor and should ripen around August.

Interesting Facts

Evidence shows that fig cultivation dates back to at least 5000 BC.

Flowers & Foliage

All figs are synconia, meaning that inside the fruit there is tens to hundreds of tiny flowers without stalks.

The foliage is green spring through summer. The leaves have a soft hairy underside and a rough hairy upper surface.
