FIG, *Ficus carica*

Fresh figs are as different from the dried form as fresh cherries are to the glazed cherry. Cut open, they look very decorative and exotic. Eaten fresh the seeds are indistinct in texture and flavour from the flesh. Eaten dried, the skin thickens and the seeds become grainy and almost crunchy. There are hundreds of varieties and variations between figs but all are sweet and luscious.

Fig White Adriatic

A green to yellow skinned medium to large sized fig with red pulp and excellent flavour. When tree ripened this fig is unsurpassed with its rich strawberry flesh. Peels very easily when ripe.

[175mm](#) | **\$19.75 AU** | Approx. [7](#) in stock

Fig - Brown Turkey

A brown skinned medium to large fig with copper-coloured skin and whitish to pink pulp. Very good quality with few seeds. A prolific bearer and popular commercial variety.

[175mm](#) | **\$19.75 AU** | Approx. [6](#) in stock

Sandpaper fig - Birds Eye

A outstanding selection of the native Sandpaper fig. Large, flavoursome, red fleshed fig. Heavy cropping and no splitting in wet weather. Ideal fig selection for wet coastal areas.

[140mm](#) | **\$12.90 AU** | [In Production](#) |  [Email me when Available](#)

Fig Excel

An early fruiting medium sized fig with amber pulp and yellow skin. A good all-purpose fig with sweet, rich pulp.

- [Blog](#)

A large sized fig with purple skin and red flesh that has a very sweet rich flavour. Grown commercially due to its high yields it is also a popular selection for home gardeners.

[175mm](#) | **\$19.75 AU** | [In Production](#) |  [Email me when Available](#)

Fig Prestons Prolific

Very thick flesh, creamy white and juicy, with sweet flavour. Extremely vigorous and late cropping.

[175mm](#) | **\$19.75 AU** | [In Production](#) |  [Email me when Available](#)

Fig - Piconi

A favourite of local fruit enthusiast John Piconi. This fig produces small fruit that is exceptionally sweet. Green skinned with dark red flesh, medium size fruit.

Height	Frost tol.	Pollination req'd	Evergreen/Deciduous	Harvest period
4	High	No	Deciduous	October - March

Tips on Fig BETA

We welcome your Tips on **Fig**. [Share Your Tip](#).

- Fig**
- Easier to manage and protect in very large pots. Chalky, alkaline, sandy soil is best. Go very light on the fertiliser, water and mulch if you want to eat the fruit, rather than a profusion of leaves. Protect from birds and control ants. Full sun. | *David White - Newcastle, NSW 04-Feb-2006*
- Fig Black Genoa**
- Grows well in pots. They will fruit from a young age however the fruit often won't ripen when young. It may be best to take the fruit off so it puts its energy into growing more foliage at first. | *Correy - Woolloongabba, QLD 02-Apr-2007*
- Fig Black Genoa**
- The taste of this fruit is superlative. Large luscious and sweet in Feb-May. The tree grows very slowly in cold Armidale, partly because of its urge to fruit. Some fruit have frass like material in them - unsure of the cause. | *Steve Walkden-brown - Armidale, NSW 10-Jun-2007*
- Fig**
- Any advice on suitable varieties for northern NSW? We are on a (very wet) north facing slope, chocolate soils. | *Rachel - Kunghur, NSW 22-Nov-2008*
- Fig**
- Does anyone have any tips on the sandpaper fig? but it's not the bird eye variety. it's on a different page of this website. just 'sandpaper fig'. cheers. | *Tara Emmerson - Vermont South, VIC 13-Jan-2009*
