## Farmington Gardens Availability

- Our availability is posted weekly for your reference only. **It does not include pricing information.**
- We are not a mail order nursery, and do not offer shipping of our plant material beyond our local delivery area. Local delivery is always available for a small fee to our customers throughout the Portland-Metro Area.
- This availability is subject to constant change, and should be viewed only as a general overview of what's in stock. Stock quantities can change dramatically over a short period of time, so **please call to confirm availability**, especially if you are coming from a long ways away, are looking for large quantities of an item, or our availability only lists a few of that item in stock.

### [Current Availability](#)

You can find a general list of our products [here](#), which lists all of the products that we currently carry or that we have carried in the past. Some of these products may not be readily available, or may be discontinued, so please keep in mind that this is just a reference..

### Landscape Plans & Plant

#### Lists

If you have a large plant list or landscape plan and need pricing and availability information, feel free to drop it off or fax it to us. We can work up a plant quote, let you know what's available, and suggest reasonable substitutions for any plants that aren't available.

#### Special Orders

We grow a majority of what we sell, and can often get larger quantities of items that we already have in stock if given notice of your need a few days in advance.

We may also be able to order specific plants that we don't grow and may not normally carry or keep large numbers of, but this is dependent on many factors, and may not always be possible or feasible.

If we can't fill your request, we can usually find a very similar substitute for the plant that will work just as well or better.
