Apples

Most all apple need a compatible pollinator to set fruit.

Self-pollinator means they will set some fruit, but to get more fruit a pollinator is helpful.

Seasons for Apples:

Early season=July-August

Mid season=September

Late season=October-November

These dates may vary.

Braeburn-Late-Season. Fruit is medium to large with green skin shaded red. Flesh is firm, crisp, juicy, and aromatic. Good dessert and keeps well.

Chehalis- Mid-Late Season. Large, greenish-yellow apple with pink blush. Similar to Golden Delicious in looks and flavor but larger and crisper. Highly scab resistant, excellent for organic growers.

Criterion- Mid Season. Partially self polinator, bright yellow with reddish pink blush with firm, creamy white flesh and sweet, aromatic outstanding flavor. Heavy producer. Fresh, cooked, dried, or canned. Excellent keeper.

Freedom-Early-Mid Large red fruit. Flesh crisp, juicy, medium coarseness. Flavor acid and sprightly. Vigorous, spreading, productive. Highly resistant to scab, mildew, and rust. Sauce, juice, eating. Good pollinator for Liberty.

Fuji-Late Sweet, red striped over yellow. Japanese bred hybrid. Crisp. Moderately scab resistant. Stores well.

Gala-Mid Fruit is bright scarlet striped over yellow. Dense aromatic flesh with semi-sweet flavor. Excellent fresh. Keeps very well.

Golden Delicious- Late Season-Fruit medium to large. Skin yellow with pink blush. Flesh crisp, firm, juicy, sweet and aromatic. **Good pollinator.**

Golden Sentinel-Mid Very large, solid golden yellow fruit, crisp and sweet with pure white flesh. Sweet, juicy and delicious. Disease resistant and productive. Pollinate w/ any other columnar variety. Good fresh. Ornamental columnar tree useful for small spaces. Good in containers for patio or deck.

Granny Smith-Late Fruit large, round, slightly elongated. Skin bright green with white dots, tart and very juicy. Tree very vigorous, upright and spreading. Excellent cooking, eating, and sauces. Stores very well. Self-pollinator

Gravenstein-Early Fruit red and green striped. Flesh is fine textured, firm, crisp and juicy. Outstanding flavor, excellent cooking, eating, baking, etc.

Honeycrisp- Mid Season- Large fluorescent red apple with a sweet-tart flavor and very crisp flesh. Good pollinizer for other apples.

Jonagold-Late Fruit large, red stripes over lively yellow green. Flesh cream colored, moderately firm, crisp, juicy, slightly coarse texture. Will not pollinize others. Very good dessert, excellent cooking. Stores very well.

King-Mid Fruit large but irregular shape. Red striping over yellow ground color. Flesh pure white, coarse, firm, crisp, juicy, and sweet. Rich flavor. Will not pollinize others. Good baking and eating. Stores well. Old favorite.

Liberty-Late Fruit is medium size, dark red over yellow. Flesh is juicy, crisp, subacid flavor. Resistant to scab and mildew. Good fresh, cooking, canning, or desserts. Flavor intensifies in storage. Self pollinator.

McIntosh-Mid Fruit medium size,

nearly round. Skin yellow with bright blush. Flesh white, sweet, tender, somewhat soft and juicy. Good dessert quality. Self pollinator.

Melrose-Late Fruit medium to large, roundish in shape. Skin yellow with bright red blush. Flesh white, firm, juicy, crisp, slightly acid. Excellent dessert and cooking quality. Stores well. Self pollinator.

Mutsu- Late Season- Large, round, yellow fruit with crunchy, juicy flesh and tart, slightly spicy flavor.

Newtown Pippin-Late Fruit large, roundish to slightly flat. Skin solid green. Flesh cream colored, crisp and tart. Excellent cooking and eating. Good cider. Good keeper. Self pollinator.

Red Delicious- Mid Season- Fruit medium size, tapering shape. Skin solid red or striped. Flesh juicy and sweet.

Scarlet Sentinel- Late Sept.- Jumbo greenish yellow and red fruit is very sweet and juicy with pure white flesh. Productive and disease resistant. Columnar tree.

Spartan-Late Fruit medium, nearly round. Skin mahogany red. Flesh white, crisp, juicy. Highly aromatic. Scab and mildew resistant. Excellent for fresh eating and desserts. Good keeper. Self pollinator.

Yellow Transparent-Early

Medium to large fruit with transparent pale yellow skin. Crisp, very sweet, juicy, white flesh is very light in texture and can be easily solar-dried. Scab resistant. Often harvested when greenish yellow. Excellent fresh or dried. Considered one of the best for sauce and pies.
