# CALIFORNIA FRESH FIG GROWERS AND SHIPPERS

During a normal year, the season for first crop fresh Mission figs grown in the San Joaquin Valley begins in early to mid June and lasts approximately two weeks. The second crop of Mission figs, as well as other varieties, including Calimyrna and Kadota figs are available mid-July. Brown Turkey figs may be available as early as late-May through December. Orders for fresh figs are hand picked on a daily basis. We suggest you contact a shipper prior to the season to establish available dates and to reserve fresh figs.
