

FIG

**CELESTE**

Medium sized, sweet fruit with amber pink flesh. Bears well and ripens in early July. One of the best for our area; purple-brown skin, pink flesh; medium fruit with excellent flavor; closed eye; very cold hardy. and a later crop often lasting into December. Sweet, juicy and very full flavored; hardy to 25° F; Phythoptera resistant flesh; very juicy. Bears well; ripens early July.

**GOLDEN CELESTE**

Medium sized, sweet fruit with amber pink flesh. Heavy bearer and ripens in early July.

**ITALIAN BLACK**

Very large-sized sized, sweet fruit with amber pink flesh. Ripens in July.

LSU PURPLE

Medium sized, sweet fruit with amber pink flesh. Bears well and ripens in late June. Introduced by Louisiana State University in 1991. Its breeder, E. N. O'Rourke, says the plant is nematode resistant. Well adapted to the Deep South. Fairly tender

NATIVE BLACK

Large sized, sweet fruit with amber flesh. Bears well and ripens in early July.

TEXAS EVERBEARING (Brown Turkey)

Medium to large sized, yellowish-brown, sweet fruit with amber flesh mostly without neck. Cold hardy. The tree is vigorous, very large and productive. The crop starts ripening in mid-July and bears well into the fall. It fruits on new growth if winter killed. Often

bears two crops a
year.
